

Aluminum injection packer is use for concrete crack repairs, waterproofing, rehabilitation of concrete structures, basement leak sealing crack sealing etc. It matched with high pressure injection pump, suits for both polyurethane and epoxy injection.

### Specification

Item No.	Length(mm)	Rubber diameter(mm)	Drill Bit diameter(mm)
A8	70	13.5	14
A10	90	13.5	14
A15	135	13.5	14
A20	190	13.5	14
A25	230	13.5	14
A30	280	13.5	14
A40	390	13.5	14
A50	490	13.5	14
A100	990	13.5	14
B8	70	9.5	10
B10	90	9.5	10
T8	70	12.7	13
T10	90	12.7	13
T15	135	12.7	13

#### STANDARD SERIES

#### THIN SERIES

#### TAIWAN SERIES

**OEM SERVICE:**  
Because different customer's drill diameter is different, so we can offer service of customize including: specification, quality of rubber and brand.

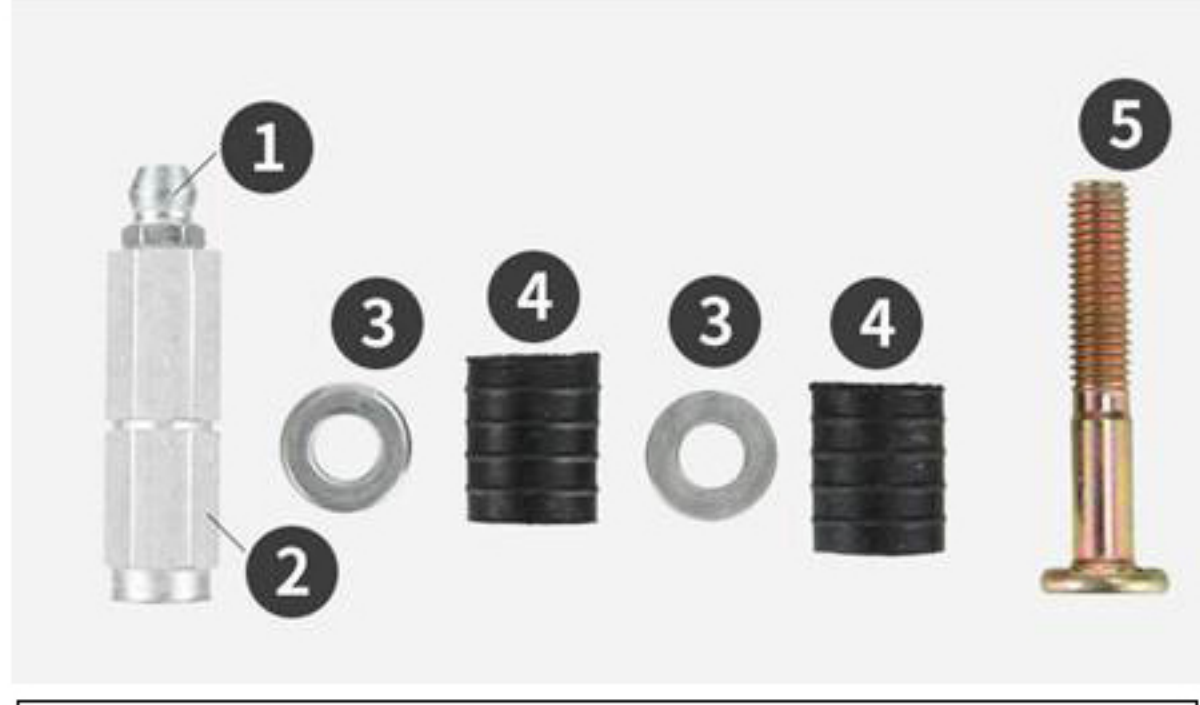

### Our advantages:

It made by high density aluminum, not easy to be bent.

High quality steel injector, good sealing and won't slide down.

Nitrile rubber, no refurbish rubber, adjustable elasticity rubber, high toughness and wear-resisting.

Endurable in high pressure, can keep the perfusion slurry completely injected into the depth of micro cracks of structure. Kindly see our quality shown as below:

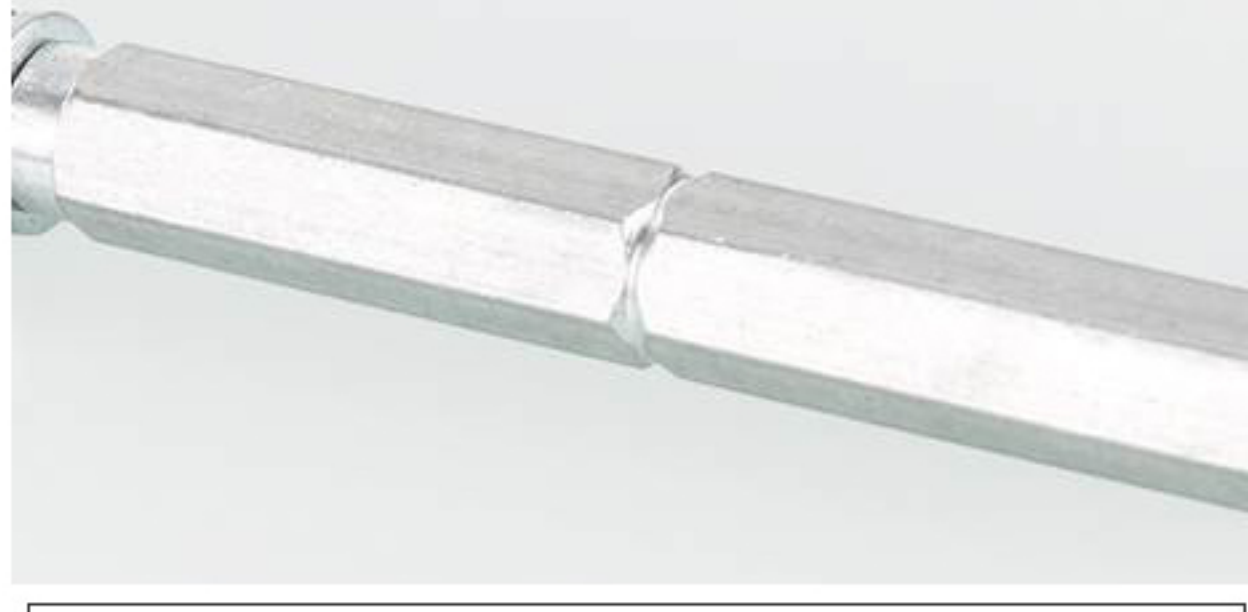

Structure description:

1. One-way stop valve
2. Thickened aluminum tube
3. Gasket
4. High elastic rubber ring
5. Galvanized threaded pipe: smooth thread, no slip

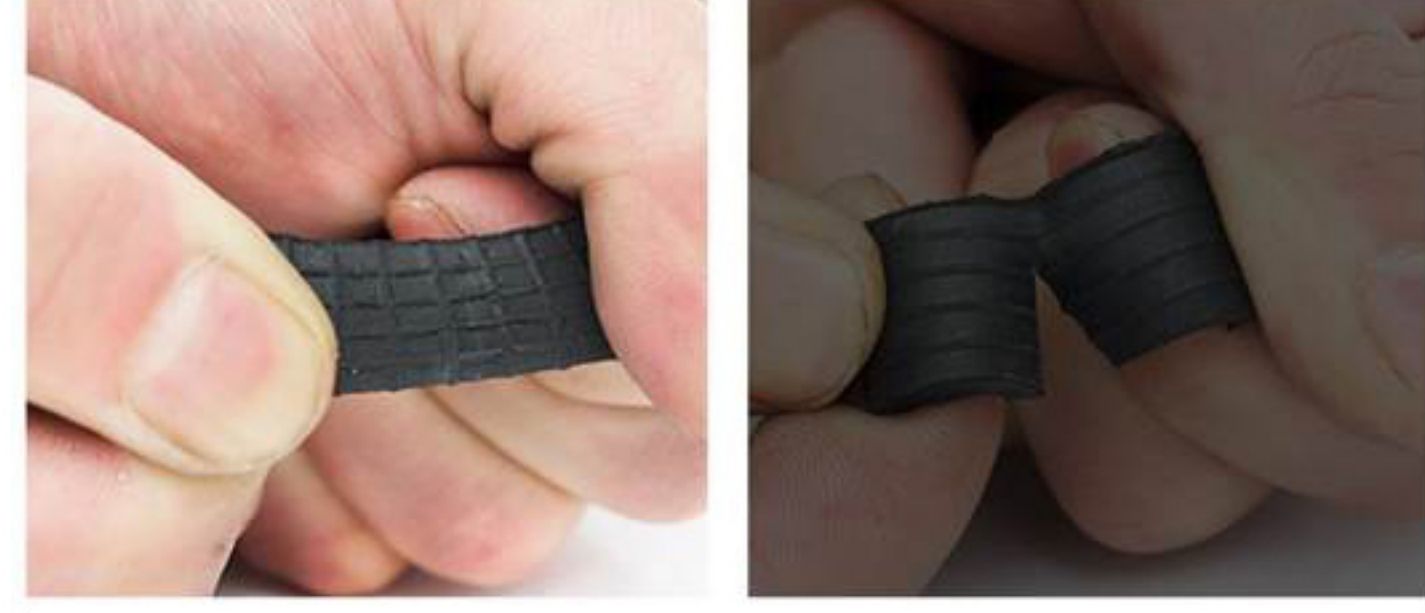

1. One-way stop valve: prevent the slurry from flowing back under high pressure perfusion

2. Thickened aluminum tube: refined by CNC processing, high pressure resistance.

Cross net structure      horizontal structure      vertical structure

4. High elastic rubber ring: good elasticity and toughness can be made into cross net structure, horizontal structure, and vertical structure.

5. Galvanized threaded pipe: smooth thread, no slip

If you want to know more about High Pressure Aluminum injection packer, or other related Steel Injection Packer, Pa66 Hammer Injection Packer and other products, you can contact us without hesitate.

### Our Factory of High Pressure Aluminum injection packer:

Our factory has more experience in producing High Pressure Aluminum injection packer, and we can provide multiple types related products, for example High Pressure Steel Mechanical Injection Packer, Pa66 Hammer Injection Packer and so on. We have strong R & D capabilities and can customize to sample. If you want to know more details about these, welcome to contact us!

We carry a very large inventory and strive to supply you with the most suitable product.

We also custom produce almost any design to meet our customer's needs.

### OEM SERVICE of High Pressure Aluminum injection packer:

**We offer service of custom request specification, quality of rubber and brand.**

Thank you for your support and identification and please continue to give us advices and encouragement, so that we can have more opportunities to improve ourselves and provide service for everyone. Your suggestions are always the growth impetus for ShengLong Team.

Looking forward to your inquiry for High Pressure Aluminum injection packer.
